

QUICK & EASY DIY FACE MASK PATTERN

instructions:

- ① Cut two pattern pieces out of your favorite fabric.
- ② With wrong sides together using a 1/4 seam allowance, stitch along the curved sides. Clip the fabric along the curved edge close to the stitching. Be careful not to clip the seam.
- ③ Fold the mask right sides together so the curved stitching line is in the center. Using a 1/4 inch seam start 1/2 inch away from the edge and stitch across the top, stopping 1/2 inch from the other side. Repeat along the bottom but leave a 1/2 inch opening for turning.
- ④ Turn mask right side out. Top stitch all the way around the mask. Stitch close to the edge along the top and bottom, but 1/2 inch from the sides.
- ⑤ Cut two pieces elastic approximately 9 inch for small mask (children), 9 1/2 inches for medium mask (women), 10 inches for large mask (men). Feed elastic through the side opening and stitch the ends together about 1/2 inch from the end. Check sizing before stitching ends of elastic. Trim close to stitching.

Pull stitched end into the casing. Finished!

Supplies:

- 1/4 yard fabric will make multiple masks (soft stretchy cotton is comfortable and works great)
- 2 pieces of elastic each 9-10 inches long (1/8 inch wide flat elastic, or elastic cording)
- scissors
- sewing machine
- rotary cutter
- cutting mat
- bodkin
- straight pins
